

# Lassa fever Situation Report

Epi Week 14: 05 – 11 April 2021

## Key Points

**Table 1: Summary of current week (14), cumulative from Epi week 01–14, 2021 and**

Reporting Period	Suspected cases	Confirmed cases	Probable cases	Deaths (Confirmed cases)	Case Fatality Ratio (CFR)	States and LGAs affected (Confirmed cases)
Current week (week 14)	43	8	0	1	12.5%	State(s): 4 LGA(s): 5
2021 Cumulative (week 1-14)	1549	241	3	50	20.7%	State(s): 14 LGA(s): 52
2020 Cumulative (week 1-14)	4287	963	14	188	19.5%	State(s): 27 LGA(s): 126

comparison with previous year (2020)

## Highlights

- In week 14, the number of new confirmed cases increased from 3 in week 13, 2021 to 8 cases. These were reported from 4 States (Ondo, Edo, Plateau and Bauchi) (Table 3)
- Cumulatively from week 1 to week 14, 2021, 50 deaths have been reported with a case fatality rate (CFR) of 20.7% which is higher than the CFR for the same period in 2020 (19.5%)
- In total for 2021, 14 States have recorded at least one confirmed case across 52 Local Government Areas (Figure 2 and 3)
- Of all confirmed cases, 79% are from Edo (43%), Ondo (29%) and Taraba (7%) States.
- The predominant age-group affected is 21-30 years (Range: <1 to 70 years, Median Age: 30 years). The male to female ratio for confirmed cases is 1:0.9 (Figure 4)
- The number of suspected cases has decreased compared to that reported for the same period in 2020
- No new Healthcare worker affected in the reporting week 14
- National Lassa fever multi-partner, multi-sectoral Technical Working Group (TWG) continues to coordinate the response activities at all levels

Table 2: Key indicators for current week 2021 and trend compared to previous week, Nigeria

Indicator	Number for current week	Trend from previous week	Cumulative number for 2020
Probable cases	0	↔	3
Health Care Worker affected	0	↔ ↔	4
Cases undergoing treatment in Treatment centres	8	↔	220
<b>Contact tracing</b>			
Cumulative contact listed	8	↔	1872
Contacts under follow up	637	↔	637
Contacts completed follow up	87	↔	1224
Symptomatic contacts	0	↔ ↔	4
Positive contacts	0	↔ ↔	4
Contacts lost to follow up	0	↔ ↔	7

#### Key

- ↑ Increase
- ↓ Decrease
- ↔ No difference

Table 3. Weekly and Cumulative number of suspected and confirmed cases for 2021

States	Current week: (Week 14)					Cumulative (Week 1 - 14)				
	Cases				Deaths (Confirmed Cases)	Cases				Deaths (Confirmed Cases)
	Suspected	Confirmed	Trend	Probable		Suspected	Confirmed	Probable	HCW	
1 Edo	21	1	▲			905	103			12
2 Ondo	13	5	▲		1	296	69	1	2	19
3 Taraba						47	18	1	1	11
4 Ebonyi						86	15			1
5 Bauchi	2	1	▲			41	8			2
6 Plateau	1	1	▲			16	8			
7 Kaduna	1					42	6			4
8 Enugu						6	4	1	1	1

## Response activities

- Conducted 2021 Lassa fever high burden States preparedness/response engagement meeting
- Lassa fever alert letters sent to States
- The National Emergency Operations Centre alert mode activated 2021 for effective multi-sectoral, multi-disciplinary coordination of Lassa fever response
- State Public Health Emergency Operations Centre activated in affected States
- The five Lassa fever molecular laboratories in the NCDC network are working full capacity to ensure that all samples are tested and results provided within the shortest turnaround time
- Confirmed cases are treated at identified treatment centres across the states
- Dissemination of reviewed case management and safe burial practices guidelines
- Risk communications and community engagement activities have been scaled up across states using television, radio, print, social media and other strategies
- Implementation of Lassa fever Environmental response campaign in high burden states by Federal Ministry of Environment
- Deployment of National Rapid Respond Teams to three States to support Lassa fever Response

## Notes on this report

### Data Source

Information for this disease was case based data retrieved from the National Lassa fever Emergency Operations Centre.

### Case definitions

- Suspected case:** any individual presenting with one or more of the following: malaise, fever, headache, sore throat, cough, nausea, vomiting, diarrhoea, myalgia, chest pain, hearing loss and either a. History of contact with excreta or urine of rodents b. History of contact with a probable or confirmed Lassa fever case within a period of 21 days of onset of symptoms OR Any person with inexplicable bleeding/hemorrhagia.
- Confirmed case:** any suspected case with laboratory confirmation (positive IgM antibody, PCR or virus isolation)
- Probable case:** any suspected case (see definition above) who died or absconded without collection of specimen for laboratory testing
- Contact:** Anyone who has been exposed to an infected person, or to an infected person's secretions, excretions, or tissues within three weeks of last contact with a confirmed or probable case of Lassa fever

### Calculations

- Case Fatality Rate (CFR) for this disease is reported for confirmed cases only
