Lassa fever Situation Report

Epi Week 37: 7 – 13 September 2020

Key Points

Table 1: Summary of current week (37), cumulative from Epi week 01-37, 2020 and

| Reporting Period | Suspected cases | Confirmed cases | Probable cases | Deaths (Confirmed cases) | Case Fatality Ratio (CFR) | States and LGAs affected (Confirmed cases) | | |
|-----------------------------------|-----------------|-----------------|----------------|--------------------------------|------------------------------|--|--|--|
| Current week (week 37) | 47 | 6 | 0 | 0 | 0.0% | State(s): 2 LGA(s): 4 | | |
| 2020 Cumulative (week 1-37) | 5694 | 1084 | 14 | 225 | 20.8% | State(s): 27 LGA(s): 129 | | |
| 2019 Cumulative (week 1-37) | 3728 | 694 | 18 | 149 | 21.5% | State(s): 24 LGA(s): 83 | | |

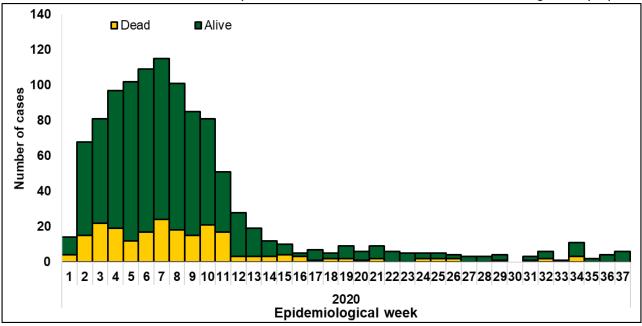

comparison with previous year (2019)

Highlights

- In week 37, the number of new confirmed cases increased from 4 in week 36, 2020 to 6 cases. These were reported from 2 States (Edo and Ondo) (Table 3).
- Cumulatively from week 1 to week 37, 2020, 225 deaths have been reported with a case fatality rate (CFR) of 20.8% which is lower than the CFR for the same period in 2019 (21.5%).
- In total for 2020, 27 States have recorded at least one confirmed case across 129 Local Government Areas (Figure 2 and 3).
- Of all confirmed cases, 74% are from Ondo (35%), Edo (32%) and Ebonyi (7%) States.
- The predominant age-group affected is 21-30 years (Range: <1 to 99 years, Median Age: 30 years). The male to female ratio for confirmed cases is 1:0.9 (Figure 4).
- The number of suspected cases has significantly increased compared to that reported for the same period in 2019.
- No new Healthcare worker was affected in the reporting week 37.
- Lassa fever outbreak emergency phase declared over on the 28th of April 2020 based on composite indicators national threshold.

• National Lassa fever multi-partner, multi-sectoral Technical Working Group (TWG)

Epi Week: 37 2020

continues to coordinate the response activities at all levels.

Response activities

- The National multisectoral Lassa fever Emergency Operations Centre (EOC) was activated to coordinate response activities across States. States with confirmed cases have activated state-level EOCs.
- National Rapid Response Teams have been deployed from NCDC to support response activities in ten States
- Surge staff (Doctors, Nurses, Laboratorians and Hygienist) deployed to ISTH and FMC Owo
- State Public Health Emergency Operations Centre activated in affected States
- The five Lassa fever molecular laboratories in the NCDC network are working full capacity to ensure that all samples are tested and results provided within the shortest turnaround time
- NCDC is working to support every state in Nigeria to identify one treatment centre, while supporting existing ones with care, treatment and IPC commodities
- Risk communications and community engagement activities have been scaled up across states using television, radio, print, social media and other strategies
- Implementation of Lassa fever Environmental response campaign in high burden states by Federal Ministry of Environment

Notes on this report

Data Source

Information for this disease was case based data retrieved from the National Lassa fever Emergency Operations Centre.

Case definitions

- Suspected case: any individual presenting with one or more of the following: malaise, fever, headache, sore throat, cough, nausea, vomiting, diarrhoea, myalgia, chest pain, hearing loss and either a. History of contact with excreta or urine of rodents b. History of contact with a probable or confirmed Lassa fever case within a period of 21 days of onset of symptoms OR Any person with inexplicable bleeding/hemorrhagia.
- Confirmed case: any suspected case with laboratory confirmation (positive IgM antibody, PCR or virus isolation)
- Probable case: any suspected case (see definition above) who died or absconded without collection of specimen for laboratory testing
- Contact: Anyone who has been exposed to an infected person, or to an infected person's secretions, excretions, or tissues within three weeks of last contact with a confirmed or probable case of Lassa fever

Calculations

Case Fatality Rate (CFR) for this disease is reported for confirmed cases only
